⬈ (drawing track with a. Start, b. Track of the drawing line, c. End)	a. Press/hold the gesture button ❷ or ❻ b. Draw the line as the ⬈ arrow direction c. Release gesture button ❷ or ❻ Then the picture has been zoomed in.
Original	Zoom In
Adjust Mouse Sensitivity

Click the icon " 🖱 " at the system tray and select "DPI Setting" to adjust mouse sensitivity among 800-1000-1200-1600-2000 DPI depending on different display applications.

Mouse Resolution instruction:

Select and save it in mouse memory as per resolution display.

Display resolution 1280*1024 advise for 800 DPI
Display resolution 1440*900 advise for 1000 DPI
Display resolution 1680*1050 advise for 1200 DPI
Display resolution 1920x1200 advise for 1600 DPI

Mouse Resolution: for example: 800DPI means that when mouse move on desktop at 1 inch, the cursor display 800 dot distance, the more for resolution, the further the mouse cursor moves.

● 800 DPI   ● 1000 DPI   ● 1200 DPI   ● 1600 DPI   ● 2000 DPI

OK   Cancel

Adjust Mouse Report Rate

Click the icon "![icon]" at the system tray and select "Report Rate" to adjust mouse report rate.
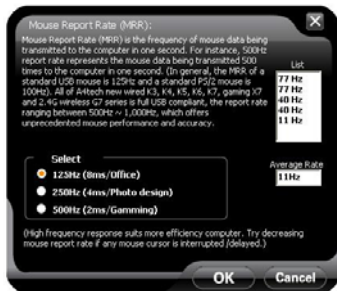

1X Speed: USB report rate is 125Hz, suitable for office and a general user, power consumption is the lowest.

2X Speed: USB report rate is 250Hz, suitable for CAD users, power consumption is normal.

4X Speed: USB report rate is 500Hz, suitable for heavy-duty game players, power consumption is high.

Change the Mouse Wheel to 4-way Wheel

Click the icon ![icon] at the system tray and select "4-way Wheel".

1) The 4-way Wheel splits the working screen into 2 areas A and B as shown on the right. When the cursor locates in area A, the wheel will perform vertical scrolling; when the cursor locates in area B, the wheel will perform horizontal scrolling

2) You may move the Red split icon to change the ratio of area A and B.

(Note: If the "**Normal Wheel**" is selected, the wheel will perform as a normal mouse wheel, and "4-way Wheel" function won't be launched.)

Power-saving Management

1. Click the icon ![icon] at the system tray and select "Power Management ".

Instant Power-saving Management:

The intelligent power-saving management supports "Slight, Little, Middle & Deep" 4 working modes. User may select which mode is preferable.

<<Reminder: use mouse pad with white color instead of black, it will save more power. Higher power consumption is required if 500Hz bandwidth is used during the game play. Rechargeable batteries is recommended for intensive mouse users, and always turn-off the mouse power when long time no use>>

(Note: exceeding management of power saving will result in mouse lag response and cursor zig-zag movement)

Time interval
(to enter into Deep Sleeping Mode) settings 10 ▼ (Min.)   [Battery Indicator]

○ Move to wake up :
(This is convenient to awake the mouse, and it consumes 0.35mA current when in stand-by status)

● Click to wake up :
(This requires a click to awake the mouse, yet it consumes as less as 0.03mA current in stand-by status)

[OK] [Cancel]

2. Battery status：Click "Battery Indicator" to see the battery power status.

Check Battery Power

Mouse Battery :

[████] 100%

Note: The Laser Pointer on your Mouse requires high power to function, if supplied voltage under 1.1 volts and the remaining power is less than 25% , it will not work properly. Replace with new batteries if needed.

☐ Low Battery Inform

3. Low battery inform：Low battery informs will pop up at the right corner of your screen when battery low.

Keyboard/Mouse Simulation:

You may setup mouse button to simulate a keyboard's keystroke or a key combination with "Win", "Ctrl", "Shift" and "Alt". Also you may setup mouse button to be one of "mouse left button, mouse right button, wheel up and wheel down".

Key Combination:

Quickly execute hotkey commands, such as: Cut, Copy, Paste, Delete, Search, Select All, Redo, Undo, New File, Open File, Save File, Print, etc.

Office Sets

Quickly execute other office commands, such as: "Zoom In, Zoom Out, Paste Text, Double Click and Triple click".

Internet & Multimedia:

Quickly execute Internet / multimedia commands, such as: Backward, Forward, Stop, Refresh, Search, My Favorite, Web Browser, E-mail, Media Player (Open), Previous, Next, Stop, Play/Pause, Mute, Volume+, Volume, etc.

Click the icon ![icon] at your system tray, the full task list of Screen Capture Tool will pop up as shown below:

✓ Auto Launch on Boot
⊘ Mouse-Control Panel
⬉ DPI Set
⏱ 4-Way Wheel Settings
🔖 Function/Key Reminder
▦ Power Management
🔒 RF Channel Settings
▥ Best Wireless Signal Monitoring
⟲ Report Rate Settings
⦿ A4tech G-Family
🔲 Open G9 Screen capture tool
◁ Exit

Auto Launch on Boot

If this task is selected, Screen capture tool will auto-execute when the system boots up.

Mouse-Control Panel

Open "Mouse Properties" of your Windows system, e.g., you may setup mouse pointers and other often-used mouse settings.

Notice:

To ensure a good wireless connection, please read below instructions for your reference:
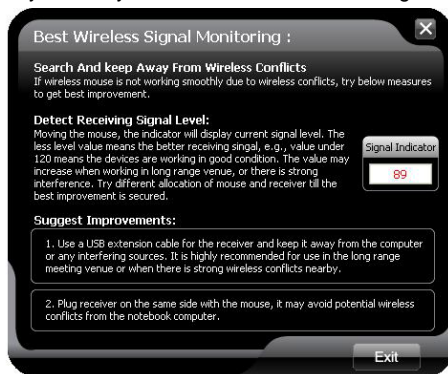

1. Avoid channel confliction from auto channel hopping

1) Click the icon ![icon] at the system tray and select "RF Channel Setting".

2) Select "Channel-lock" to define a private channel to secure better wireless connection quality.

2. Avoid interference from iron panel of PC

Click the icon 📋 at the system tray and select "Best Wireless Signal Monitoring".

- 17 -

If the wireless mouse is not working smoothly due to wireless conflicts, try below methods to get improvement.

A) Please plug the Multi-link receiver into ③、④ to avoid shielding wireless signal instead of ①、②.
①②③④ USB Ports

B) Use USB extension cable to position the Multi-link receiver at a distance to prevent electromagnetism interference from devices.

Troubleshooting & FAQ

If the mouse is not working:

1. Make sure the mouse power is on
2. Try another USB port
3. Ensure the Multi-link receiver is inserted
4. Check battery and battery installation
